Let's Start!

Taking into Account All Types of Potential Scenarios

Learning Outcome:

Gives information about instruments for data collection.

Apply methods for data collection, designing the necessary instruments for information processing, according to the situation set by the company.

Ask your partner:

- How do you usually create a plan to achieve something?
- Why is it important for companies to achieve their goals?

Can Do Statements:

- I can describe how to draw a business process diagram.
- I can talk about the three stages to consider to diagram the business process.
- I can give advice about how to develop each stage.

Let's Explore!

Andrea teaches Jefferson how to create a business process diagram.

Instructions: Read the text below.

Jefferson: Hello, Andrea. What are you doing?

Andrea: Hi! I have to draw a business process diagram.

Jefferson: Really? Can I help? I want to learn how to create those types of diagrams.

Andrea: Sure! As you know, we use these diagrams to describe a roadmap for the implementation of a set of activities. These activities help the company achieve a specific goal. In order to draw it, we need to follow three stages.

Jefferson: Can we go over those stages in detail before we start?

Andrea: No problem. First, create a preliminary diagram that contains a general overview of the process. To do that, use information from previous meetings, managers, and stakeholders. That's what we call the upfront discovery.

Jefferson: Can I obtain information from different areas of the company?

Andrea: That's the second stage. You need to gather additional requirements. To do so, speak with every person involved in each phase of the process. In this stage, you may find that some employees don't follow established procedures.

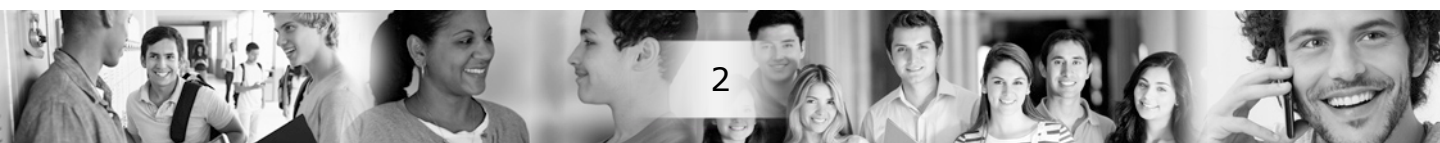

Jefferson: And, Can I include all that information on the diagram?

Andrea: At this stage, stop and ask yourself important questions such as: what's the overall goal of the business process? When does the process start? When does it finish? Make sure to use the proper terminology and don't hesitate to make changes if you need.

Jefferson: What's the third stage?

Andrea: When you get to the third stage, include all the requirements on the diagram. Make sure the information is very detailed and easy to read. After that, show your diagram to other people and repeat stages two and three until everyone is happy with the results.

Jefferson: Thanks a lot, Andrea.

Let's Practice!

Can I help you with the business process diagram?

Instructions: Circle the correct word to complete the paragraph.

Do you remember the three stages to create a business process diagram? First, (creates / to create / create) a preliminary diagram that contains a general overview of the process. Then, (gathering / gather / gathered) additional requirements: to do so, (speak / speaks / speaking) with every person involved in each phase of the process. Finally, (include / including / includes) all the requirements on the diagram.

Let's Practice!

What do you know about the three stages?

Instructions: Select the correct answer.

1. When can you gather additional information about the steps to make a process?
(Hint: It is the same stage where you can ask yourself important questions.)
a. First stage
b. Second stage
c. Third stage
2. When can you ask managers for information about the process?
(Hint: It is the same stage in which you can create an initial diagram.)
a. First stage
b. Second stage
c. Third stage
3. When can you present the final diagram showing all the details of the process?
(Hint: It is the same stage in which you include all the requirements in the diagram.)
a. First stage
b. Second stage
c. Third stage
4. When can you make a preliminary diagram of a general overview of the process?
(Hint: It is where you start.)

e.g. At this stage, stop and ask yourself important questions.
- **hesitate** (verb) to doubt or give second thoughts
e.g. Make sure to use the proper terminology and don't hesitate to make changes if you need.

Learning Points

Verb Can for Permission

We use the modal verb **can** to ask for **permission**.

When you want to ask for **permission** to do something, you usually use **can**. Remember that **can** is a modal verb, therefore, you do not need to conjugate this verb depending on the subject.

In order to create sentences to ask for **permission**, you can follow the next structure:

Can + subject + verb + complement + ?

Examples:

Can I create an initial diagram?

Can she gather the additional requirements?

Examples

- *Really? Can I help?*
- *Can we go over those stages in detail before we start?*
- *Can I obtain information from different areas of the company?*

How to Diagram a Business Process

A business process diagram is a graphic representation of a series of steps that seek to achieve a company's goal.

There are three stages to diagram a business process:

1. Generate a simple diagram based on the initial talks and meetings.
2. Bring together the additional requirements.
3. Include the requirements in the diagram.

It is advisable to repeat steps number two and three until everybody agrees on the diagram and what it shows.
