Let's Start!

Let's talk about diagramming a business process.

Learning Outcome:

Understands systems theories, business processes and basic concepts on IT.
Create a map of processes that allows identifying areas in an information system, using IT tools to generate reports based on the company's needs.

Can Do Statements:

- I can talk about the importance of diagramming a business process.
- I can explain in a simple way the components of a business process diagram.

Ask your partner:

- Why do businesses have to manage their own processes?
- What kind of processes in an organization do you know?

Let's Explore!

Jefferson receives information about the business process diagram.

Instructions: Read the text below.

Andrea: Hello Jefferson.

Jefferson: Hi Andrea. I am calling you because I want to understand the importance of a business process diagram.

Andrea: Absolutely. As you know, businesses have goals. These goals include a series of activities or tasks. Each activity appears in order of execution. Here the manager knows which activities go first. So, organizing a diagram increases productivity and cuts costs. It arranges a process and specifies possible situations and outcomes. It helps the business to improve and implement changes.

Jefferson: Does the business process diagram include all the different parts involved in a business?

Andrea: Yes, in a diagram you put activities next to the areas that are in charge of them. Then you draw lines that connect the activities with processes. Between each activity, most of the times there is a Yes or No in order to know what to do if an outcome or failure is present. This diagram helps your business to look at the big picture and consider all possible scenarios.

Jefferson: And after you draw the diagram, what happens?

Andrea: Well, another positive outcome of the business process diagram is that it can create a visual aid that everyone can see, discuss and agree on. It can help you decrease upfront errors and prevent unnecessary changes during production or selling.

Jefferson: What are the elements of a business process diagram?

Andrea: There are four basic components of a business process diagram. First, the flow objects. Flow objects represent events, activities, and gateways or paths. Second, the connecting objects. Connecting objects represent associations and participants in a process. Third, the swim lanes. The swim lanes contain lanes, like a real swimming pool. And, fourth, the artifacts. Artifacts show the reader the requirements and productivity in an activity. Among these parts of the diagram, you can develop actions and processes.

Jefferson: Thank you, now I understand.

**Let's Practice!**

Jefferson summarizes the information to Andrea.

Instructions: Read the following sentences based on the text. In front of each sentence write True or False.

1. With a business process diagram, you have a main view of how implement a process. _____
2. The best option is to create the diagram after making an arrangement. _____
3. A diagram is a great way of increasing the costs. _____

**Let's Practice!**

Andrea tells Jefferson how to draw a diagram.

Instructions: Match the preposition with its sentence.

PREPOSITIONS (COLUMN A)

1. With
2. Between
3. Next to
4. Among

SENTENCES (COLUMN B)

- a. You put activities _____ the areas in charge of them.
- b. You draw lines that connect activities _____ processes.
- c. You put the connecting points. These are the participants, _____ the activities and processes.
- d. Once you have all these pieces together, you can make arrangements _____ them.

Extension Activity

Let's think about business processes.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Look for information about a specific business.
- Describe the activities and processes inside that business.
- Write a possible scenario for it.
- Draw a process diagram and present it to you classmates.

Self-Assessment

Yes

No

- I find information about a business. ☐ Yes ☐ No
- I describe the activities and processes inside a business. ☐ Yes ☐ No
- I design a possible scenario for a specific business. ☐ Yes ☐ No
- I present my business process diagram to my partners. ☐ Yes ☐ No

Target Words

- **include** (verb): to incorporate or associate things
e.g. Does the business process diagram include all the different parts involved in a business?
- **be in charge** (expression): to manage or run an area, department, or company
e.g. in a diagram, you will put activities next to the areas that are in charge of them.
- **scenarios** (noun): a specific situation or special moment
e.g. This diagram will help your business to look at the big picture and consider all possible scenarios.
- **goal** (noun): the principal objective that a person or company has
e.g. As you know, businesses have goals.
- **cut** (verb): to reduce
e.g. Organizing in a diagram all the activities and tasks will increase productivity and cut costs.
- **change** (noun): the process of how a thing becomes different
e.g. It helps the business to improve and make changes.

Learning Points

Prepositions of Place

Prepositions of place are words that describe the location of an object.

You can use **prepositions of place** in English to describe the position or location of one person, animal, idea or thing with another. It answers the question "Where?"

In the next chart, you can see some examples **of Prepositions of Place**:

Preposition	Example
Next to	<i>The bank is next to the house.</i>
Among	<i>The dogs run among the cars..</i>
Between	<i>The number 2 is between 1 and 3.</i>
with	<i>She lives with me.</i>
Before	<i>1 comes before 2.</i>
After	<i>2 comes after 1</i>

Examples

- *In a diagram you, will put activities next to the areas that are in charge of them*
- *Then you draw lines that connect the activities with processes.*

Learning Points

Why should you diagram a business process?

A business diagram increases productivity and cuts costs. This diagram is a roadmap for the expected results and will give a very good starting point to build on.

Diagramming a business process is important because:

1. it is the best a business can do in order to see all the possible scenarios.
2. it helps you understand where your business is and check all the processes so that you can improve or create new business plans.
3. it creates a visual diagram that everybody will see and will agree on.
4. it helps to see initial mistakes or avoid unnecessary changes.

Examples

- *Organizing all the activities and tasks in a diagram increases productivity and cuts costs. The diagram arranges a process that specifies possible situations and outcomes, and this is very important for a company. It helps the business to improve and make changes.*
