Let's Start!

Let's learn about information collection tools.

Learning Outcome:

Gives information about instruments for data collection.

Apply methods for data collection, designing the necessary instruments for information processing, according to the situation set by the company.

Can Do Statements:

- I can list the basic tools to collect information.
- I can write a short paragraph about the basic tools to collect information.
- I can use vocabulary related to basic tools to collect information.

Ask your partner:

- What are the most useful basic tools to collect information?

Let's Explore!

What are the most common tools to collect information?

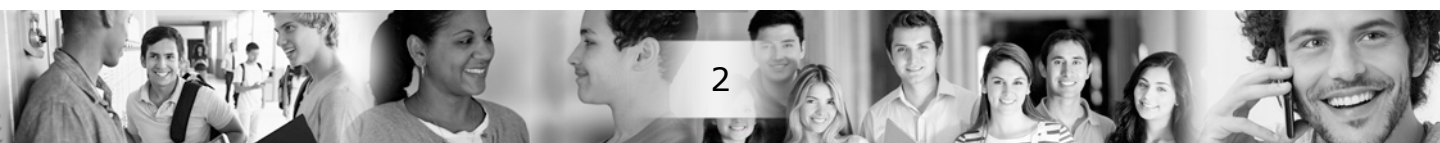

Instructions: Read the text below.

Do you hear about the tools to collect information?

The tools in the data collection are the methods for gathering and measuring information in a research. These tools extract data on variables from an established individual, group or situation. It is essential to have some objectives and a hypothetical question, which you answer to evaluate the outcomes.

These processes permit to get and organize data from primary and secondary sources, which are the different tools that you should use in any research. Then, you analyze the information in order to make informed decisions that can affect companies, and it also classifies patterns in a business.

You can use the following tools to collect information. Firstly, the observation, which collects data where and when an event or activity is occurring; however, some people don't behave naturally when someone else observe them. Secondly, the document review and analysis that collect data from written sources. Thirdly, the interview which gathers information directly from the participant, and it is very useful for gaining insight and context into a topic. Then, the questionnaires, which collect information and data from written questions. These can be open or closed questions. Finally, you can find focus groups, which collect data, information, and opinions of a group. However, someone can lead the discussion over the other participants, so sometimes you don't get the results that you want. As well, you can find the case studies, which collect information from a person, group or situation.

**Let's Practice!**

What are the main tools to collect information?

Instructions: Classify the sentences by writing the number of the sentence in the correct category.

1. Do you hear about the tools to collect information?
2. You don't interview people when you collect data from observation.
3. A case study gathers information from a situation over the time.
4. Questionnaires need open questions to collect information.
5. You don't gather information without talking to the participants.
6. Focus groups collect information from opinions.
7. A researcher doesn't collect opinions.
8. Do you behave naturally when some else observes you?

Negative Statements	Affirmative Statements	Interrogative Statements

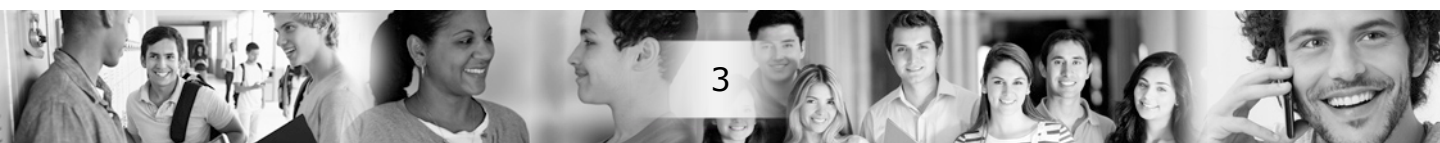

**Let's Practice!**

I can gather information from people and texts.

Instructions: Read the text. Select all the correct answers.

Collecting information can be an easy task but, it's important to ask what methods do people use to collect information? Well, people use tools like document analysis to collect data because, with this tool, they analyze data from texts. On the other hand, there are tools like observation and interviews in which you don't need to read too many texts because these permit a direct interaction with people.

1. What do people use to collect information?
 - a. People use tools like document analysis.
 - b. People don't like using tools to collect information.
 - c. People use observation and interviews because these permit a direct interaction.
 - d. People use some tools in which you don't need to read too many texts.
 - e. People don't analyze data from texts.
 - f. People use case studies.

Extension Activity

Tools to Collect Information.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Look for information about tools to collect information.
- Take some notes and classify the information of each tool in a chart,
- Share your chart with your partner.

Self-Assessment

Yes

No

- I find information about tools to collect information.
- I make a chart describing tools to get information.
- I share my chart with my partner.

e.g. It is essential to have some objectives and a hypothetical question, which you will answer in order to evaluate the outcomes.
- **informed** (adjective) knowledgeable
e.g. Then, you will analyze the information in order to make informed decisions that will affect companies.
- **useful** (adjective) referring to helpful
e.g. It is very useful for gaining insight and context into a topic.
- **gather** (verb) to collect information
e.g. The tools in the data collection are the methods for gathering and measuring information in a research.

Learning Points

Simple Present Review All Forms

The **Simple Present** tense is used to express habits, routines and general ideas.

Structure:

Subject + **[VERB]** + **s/es** (third person)

1. The simple present tense uses the base form of the verb. For example: I **work** in Bogota.
2. However, the third person (she/he/it) adds an -s: She **works** in Bogota.
3. For the negative and the interrogative form you can use auxiliary verb DO/DOES and the main verb uses the base form. For instance: **Do** you work in Bogota? No, I **don't** work.

Use:

1. You can use the Simple Present to talk about a repeated or usual action.

E.g.: I work in a school.

2. It can also designate the orator thinks or knows that a fact was true before, is true now, and will be true in the future or to make generalizations about people or things.

E.g.: The sun rises every morning.

Affirmative	Negative	Interrogative
I work	I don't work	Do I work?
You work	You don't work	Do you work?
He works	He doesn't work	Does he work?
She works	She doesn't work	Does she work?
It works	It doesn't work	Does it work?
We work	We don't work	Do we work?
They work	They don't work	Do they work?

Examples

- *These tools extract data on variables from an established individual, group or situation.*
- *Some people don't behave naturally when someone else observes them.*

Learning Points

How to Write a Short Paragraph

When you want to do a written document, you need to know how to organize your ideas in paragraphs. It will help you to guide your reader throughout the whole text and have a well-structured paper.

To write a short paragraph, you always need to plan your writing, clarify your ideas, and define the structure of your paper. Make sure your text includes the following parts:

Parts of a paragraph:

Main idea: This is a sentence or phrase that summarizes the subject of your writing.

Supporting ideas: These are ideas that permit to argument your text. These could be facts, figures, examples, statistics, etc.

Conclusion: At the end, it is advisable to write a conclusion or short summary of your main idea. This will help your reader to understand the point of your paragraph.

Recommendations:

1. Use capital letter at the beginning of the sentence.
2. Use linking words. These give your text cohesion and coherence.
